

## Moonlit HT009582-001 REALTIME CORE 270/271 Connectivity Guide

### Connectivity:

RealTime transaction 270/271 only

### RealTime CORE 270 Credentials:

Production Host: <https://ws.uhin.org/webservices/core/soaptype4.asmx>

Trading Partner: HT009582-001

Username/Password: Will be sent via secure email when setup is complete

Sender ID - ISA06/GS02: HT009582-001 Receiver ID – ISA08/GS03: HT000004-001

Information Source Name and UHIN 5 digit payer ID: 2100A NM1

<https://uhin.org/resources/payer-list/#eligibility>

### Transaction Example

#### 270

## Preface

This Companion Guide to the Health Care Eligibility and Claim Status v5010 ASC X12N/005010X279A1 and 005010X212 Implementation Guides and associated errata adopted under HIPAA clarifies and specifies the data content when exchanging electronically with Utah Health Information Network (UHIN). Transmissions based on this companion guide, used in tandem with the Eligibility and Claim Status v5010 ASC X12N/005010X279A1 and 005010X212 Implementation Guides, are compliant with both ASC X12 syntax and those guides. This Companion Guide is intended to convey information that is within the framework of the ASC X12N Implementation Guides adopted for use under HIPAA. The Companion Guide is not intended to convey information that in any way exceeds the requirements or usages of data expressed in the Implementation Guides.

## Introduction

Section 1104 of the Administrative Simplification provisions of the Patient Protection and Affordable Care Act (hereafter referred to as the Affordable Care Act) establishes new requirements for administrative transactions that will improve the utility of the existing HIPAA transactions and reduce administrative costs. Specifically, in section 1104(b)(2) of the Affordable Care Act, Congress required the adoption of operating rules for the health care industry and directed the Secretary of

Health and Human Services to “adopt a single set of operating rules for each transaction ... with the goal of creating as much uniformity in the implementation of the electronic standards as possible.”

In compliance with this requirement, Health and Human Services (HHS) designated CAQH-CORE to be the authoring entity for the required rules. HHS then designated specific CORE rule to be those operating rules. Operating rule 270 addresses connectivity requirements. These requirements apply to the (270/271) Eligibility Benefit Inquiry and Response, and the (276/277) Health Care Claim Status Request and Response. This guide is used for all transactions passed through the UHIN gateways. One of the requirements of CORE Rule 270 is that servers (generally health plans and clearinghouses) publish a connectivity companion guide on their public website. This document is published to meet that requirement.

UHIN does not deviate from the standards specified in the Health Care Eligibility and Claim Status v5010 ASC X12N/005010X279A1 and 005010X212 Implementation Guides (IGs) adopted under HIPAA and the CORE operating rules.

## Scope

This Companion Guide is to be used in conjunction with the requirements specified in the HIPAA Health Care Eligibility and Claim Status v5010 ASC X12N/005010X279A1 and 005010X212 Implementation Guides (TR3) without changing any data usage defined in those Implementation Guides. This guide was developed for the UHIN Clearinghouse and Value-Added network systems. The purpose of this Guide is to give guidance for obtaining connectivity requirement information. This guide is in compliance with the Connectivity Companion Guide Operating Rule.
